

Tizen Application Icons and Splash Screen

Official Tizen UX Guidelines are non-available yet. This section will be clarified after Tizen UX Guidelines release.

For now all icons and splash screens development for Tizen application developers have to follow Mobile Web guidelines. Everything is same.

One non mandatory optimizations may be added:

- Application icon: use 96x96 application for <APP_NAME>/Resources/mobileweb/appicon.png but 128x128 icons works well too.
